PRP Platelet Rich Plasma

A vial of your blood is concentrated into a powerful 94% platelet rich plasma. PRP contains your body's growth factors and cytokines to stimulate cellular proliferation and tissue regeneration. The serum is then injected or applied to assist the recovery and repairing process. Aesthetically, PRP can help reduce the appearance of wrinkling, scaring, texture or the skin. PRP can promote healing of wounds including acne. PRP can help boost hair growth and resolve dry eye. PRP injections are also used to speed injury recovery or tendinitis.
